

GOOD BOWELS ARE AN AID TO GROWTH

Growing Children Need a Mild Laxative to Foster Regular Bowel Movement.

As a child grows older it requires more and more personal attention from the mother, and as the functions of the bowels are of the utmost importance to health, great attention should be paid to them.

Diet is of great importance, and the mother should watch the effect of certain foods. A food still constipates and not another, and so we have a healthy food like eggs causing biliousness to thousands, and a whole-some fruit like bananas constipating many. It is also to be considered that the child is growing, and great changes are taking place in the young man or young woman. The system has not yet settled itself in its later routine.

A very valuable remedy at this stage, and one which every growing boy and girl should be given often or occasionally, according to the individual circumstances, is Dr. Caldwell's Syrup Pepsin. This is a laxative and tonic combined, so mild that it is given to little babies, and yet equally effective in the most robust constitution. At the first sign of a tendency to constipation give a small dose of Syrup Pepsin at night on retiring, and prompt action will follow in the morning. It not only acts on the stomach and bowels but its tonic properties build up and strengthen the system generally, which is an opinion shared by Dr. John Day, of Bloomfield, N. J. He has a large family and at ages where the growth and development must be watched. Little

MARIE DAY

Marie has thrived especially well on Dr. Caldwell's Syrup Pepsin. Mr. Day considers it the right laxative for young and old and has found none better for young children.

The use of Dr. Caldwell's Syrup Pepsin will teach you to avoid cathartics, salts and pills as they are too harsh for the majority and their effect is only temporary. Syrup Pepsin brings permanent results, and it can be conveniently obtained of any nearby druggist at fifty cents and one dollar a bottle. Results are always guaranteed or money will be refunded.

Families wishing to try a free sample bottle can obtain it postpaid by addressing Dr. W. B. Caldwell, 115 Washington St., Monticello, Ill. A postal card with your name and address on it will do.

Impressions of a Twelve Hundred Mile "Mush" Across Frozen Alaska

A random, unvarnished account of a midwinter overland trip from Nome to Cordova, Valdez, and Seward, Alaska, with photographic, economical and political views regarding the great northern territory.

By R. S. RODEY, of Albuquerque, ex-United States Attorney at Nome.

(Fourth installment.)

I do not believe there is a single white man in Alaska who can truthfully, without being self-righteous, put his hand on his heart and say that Alaska is his permanent home, and that he intends to stay there forever, or as long as he lives, and would not get out if he should happen to make a stake. I am strictly from Missouri on this proposition, and it is my opinion that even a squaw man would leave the country, if they made a stake, and either desert the squaw or take her with him. I know that to some extent this feeling that all the people surely have of wanting to make a stake and leave will grow less as time passes, but it has not begun to grow less yet.

On the other hand, while it is miserable to have to live there, still the extreme cold of Alaska and the "July-August" and "winter" seasons as to its actual endurableness, is greatly exaggerated by writers. There is a certain comfort in a warm cabin in an extremely cold climate, and when one is well clad, travel in twenty degrees below zero, or even in fifty below, is not such a misery as it is painted. I have known women in Alaska to travel with a dog-sled hundreds of miles—white women, I mean—such a feat is no feat at all for a squaw; she snow-shoes five or ten miles a day looking after traps and snare on the Yukon. I make the assertion that if there should be a bonanza gold discovery at the north pole, that a stampede would take place from Nome and vicinity to it, and inside of ninety days the number of men and women who would be in the new camp would make the exploits of Cook, Peary, Shackleton and Amundsen look like thirty cents.

Summer travel in Alaska will for many years be via railroads and rivers; no great amount of overland travel on the surface is possible; there is too much tundra, musk, creeks, sloughs and bogs.

After giving it considerable thought, I have made up my mind that the crowd of men that hibernates in Alaska year after year do so largely because they are independent characters, and also because it is in a sense a lazy place to get along in.

Hooray! Baby To Rule the House

No Longer Do Women Fear The Great Out of All Human Blessings.

It is a joy and comfort to know that those much-talked-of pains and other distresses that are said to precede child-bearing may easily be avoided. No woman need fear the slightest discomfort if she will fortify herself with the well-known and time-honored remedy, "Mother's Friend."

This is a most grateful, penetrating, external application that at once softens and makes pliant the abdominal muscles and ligaments. They naturally expand without the slightest strain, and thus not only banish all tendency to nervous twitching spells, but there is an entire freedom from nausea, discomfort, sleeplessness and dread that so often leave their impress upon the babe.

The occasion is therefore one of unbounded, joyful anticipation, and too much stress can not be laid upon the remarkable influence which a mother's happy, pre-natal disposition has upon the health and fortune of the generation to come.

Mother's Friend is recommended only for the relief and comfort of expectant mothers, thousands of whom have used and recommended it. You will find it on sale at all drug stores at \$1.00 a bottle. Write to-day to the Broadway Dispensary Co., 150 Lamar Bldg., Atlanta, Ga., for a most instructive book on

to his window through which the sun was shining. "I am just now determining when it is noon here, and I think I can tell you that in a short time." I turned from my lunch which I was eating to see how he was doing it, and this is what I saw. He had a flat board pinned to the wall as a window sill, and had a horse semicircle of white cardboard pinned on it. He had a tall wooden peg nicely pointed, driven into this cardboard next to the window midway on the straight side of the half circle, and he pointed out to me, that the shadow was shortest and furthest from the circumference of the circle just at noon. I watched and I took the time. It was of course an old-fashioned principle, but one does not always think of such things, somewhere necessarily forces it.

One sees curious things in the arctic at times. Things are done and expedients resorted to, that would not be thought of in other countries. One winter in the latter part of March I was present in Nome, when a man arrived from Cripple, a town more than 200 miles northeast. He arrived with six horses. Great heavy, hairy-fellows, draft horses, and every one of the horses was shod! Yes, a shod horse in snowshoes! He had a piece of rough thick plank about ten inches wide and fourteen inches or so long, attached to clamps to every one of the ponderous hoofs of the animals. Of course I examined him about it, and he told me that it would have been impossible to travel save in that way, and that even then, he had to travel mostly at night when the snow and crust was hardest. That without the "snowshoes" his horses would have gone out of sight in the snow, for it was twenty and thirty feet deep in some places. He said it did not take him more than half a day to break the horses to the use of the "shoes," and that they had easily learned to walk with them without "interfering." He said he came "cross-country," without reference to trails, and that should he remove the snowshoes, he could not induce the horses to take a single step off from the hard trail, such fear had they gained from experience, of becoming buried in the snow. He told me of having had, on other occasions, to feed some of his horses in deep holes in the snow where they had sunk, until he could get a place shoveled out to extricate them. It was a curious sight to see these great horses of his, plodding along with such enormous "hoofs."

(To Be Continued.)

WANTED TO LICK WHOLE POLICE FORCE

One Officer However Proved Enough and Now Brown Is Leaving Town With Thirty Day Sentence Over Him.

Harry Brown has left town. Harry has a thirty-day jail sentence hanging over him and with full assurance that it will be enforced if he comes back to Albuquerque soon, according to Judge Craig, who talked with Brown in police court this morning.

Late yesterday afternoon Chief McMillin received a hurry call for help from the Brown residence on South Third street where, it was said, Brown was choking his wife. The call said to send two policemen at least. The chief went himself and went alone. Brown came with him very meekly and was locked up. It was said that before the chief's arrival the man had threatened to lick the whole police force and clean out the town.

The case is a sad one. Brown has been guilty of mistreating his wife before and the officers have determined to stop his mad career. He was given thirty days in jail, or the privilege of getting out of town, accepting the latter alternative.

Five vagrants were dismissed this morning with orders to get out of town, two were sent to jail for ten days each and one plain drunk drew fifteen days, completing the morning police court record.

EAT LESS MEAT IF BACK HURTS

Take a glass of Sals to flush kidneys if bladder bothers you.

Eating meat regularly eventually produces kidney trouble in some form or other, says a well-known authority, because the uric acid in meat excites the kidneys, they become overworked; get sluggish; clog up and cause all sorts of distress, particularly backache and misery in the kidney region; rheumatic twinges, severe headaches, acid stomach, constipation, torpid liver, sleeplessness, bladder and urinary irritation.

The moment your back hurts or kidneys aren't acting right, or if bladder bothers you, get about four ounces of Jad Sals from any good pharmacy; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous Sals is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush clogged kidneys and stimulate them to normal activity; also to neutralize the acids in the urine so it no longer irritates, thus ending bladder disorders.

Jad Sals cannot injure anyone; makes a delightful effervescent lithia-water drink which millions of men and women take now and then to keep the kidneys and urinary organs clear, thus avoiding serious kidney

WOMAN WOULD NOT GIVE UP

Though Sick and Suffering; At Last Found Help in Lydia E. Pinkham's Vegetable Compound.

Richmond, Pa.—"When I started taking Lydia E. Pinkham's Vegetable Compound I was in a dreadfully rundown state of health, had internal troubles, and was so extremely nervous and prostrated that if I had given in to my feelings I would have been in bed. As it was I had hardly strength at times to be on my feet and what I did do was by a great effort. I could not sleep at night and of course felt very bad in the morning, and had a steady headache.

"After taking the second bottle I noticed that the headache was no so bad, I rested better, and my nerves were stronger. I continued its use until it made a new woman of me, and now I can hardly realize that I am able to do so much as I do. Whenever I know any woman in need of a good medicine I highly praise Lydia E. Pinkham's Vegetable Compound."—Mrs. FRANK CLARK, 3146 N. Tulip St., Richmond, Pa.

Women Have Been Telling Women for forty years how Lydia E. Pinkham's Vegetable Compound has restored their health when suffering with female ills. This accounts for the enormous demand for it from coast to coast. If you are troubled with any ailment peculiar to women why don't you try Lydia E. Pinkham's Vegetable Compound? It will pay you to do so. Lydia E. Pinkham Medicine Co., Lynn, Mass.

STOLEN HORSES IN BUNCHES BEING REPORTED

Quay County Sheriff Has Rewards Out for Seven Animals Taken During the Past Week; Cases Nearer Home.

Is there an organized band of horse thieves operating in New Mexico? Has the gang a headquarters in or near Albuquerque? Do we need the offices of the mounted police again?

These questions are being asked quietly by peace officers here and in many quarters of the state just now, for an epidemic of horse stealing seems to have broken out, the trail of which extends from the staked plains of Quay county, all along the eastern border of the state, through the Espanola valley and into Albuquerque, where a number of thefts have been made of late, none of the animals thus far having been recovered.

Yesterday the sheriff of Quay county sent out cards offering rewards for the return of seven head of horses stolen in and around Tucuman on January 9th. Yesterday Chief of Police McMillin and W. M. Brown offered \$100 reward for the return of the valuable horse stolen from Brown's barn near the tile plant, Sunday night. These are the latest cases reported, but for the past three weeks a string of horse stealing reports have come in, leading from Quay county through Turance and Lincoln and into Bernallillo county. Thirty or forty head of horses have been picked up since the first of the year and as yet no arrests have been made.

HOW'S THIS? We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure. F. J. CIERNEY & CO., Toledo, O. We, the undersigned, have known F. J. Cierney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by his firm. NATIONAL BANK OF COMMERCE, Toledo, Ohio.

Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price 75 cents per bottle. Sold by all Druggists. Take Hall's Family Pills for constipation.

"THE COMMON LAW" IS COMING Dramatization of Well Known Chambers Novel to Be Seen at Elks Theatre on Monday January 26.

It is announced by the management of the Elks' theatre that the dramatization of George W. Chambers' popular novel, "The Common Law," has been booked for the local playhouse for Monday night, January 26. This play has been a success from the moment of its first production and will be awaited with

HIGHLAND FIRE CO. MAY GET MOTOR EQUIPMENT

Fire Committee of Council Ordered to Get Bids on Another Motor Engine for Albuquerque.

CITY PAYS ALL BILLS TO JANUARY FIRST

Current Accounts Paid in Full for First Time Without Use of Previous Year's Tax Income.

The Highland fire station probably will be equipped with a motor engine and truck, similar to that in use at the central station, according to expressions of members of the city council at the regular meeting last night. One of the big black horses of the Highland station is sick and was entirely out of commission yesterday. The central station engine has been entirely satisfactory thus far and has proven more economical in maintenance than the horses, and the fire chief and council are agreed that another motor truck for the Highland station will be economy. The fire committee was instructed to get bids on the new equipment which it is expected the city will buy as soon as funds are available.

The city council last night paid all current bills up to January 1, and Alderman Clarke of the finance committee reported that this had been done without using a cent of the taxes for 1913, which were not available. Alderman Isherwood, who was presiding in the absence of Mayor Sellers, stated that this was the first time the city had been able to do this. He had been a member of the council. As Mr. Isherwood has been a member of the council off and on, mostly on, for about twenty years, the showing is a remarkable one.

Mr. Clarke presented a bill from Mrs. M. B. Cover for \$25, which she stated she would accept in lieu of all claims against the city for an accidental fall which she had on a defective sidewalk some time ago and which laid her up for two weeks. The matter was referred to the mayor, who is familiar with the case.

Mayor Sellers arrived at the council meeting just at 9 o'clock, having had an engagement to speak at the Moose lodge. The council hurriedly adjourned just as the mayor entered, shutting off a considerable grind of business which he desired to have transacted. The mayor threatens to get even by calling a special session.

The bond of George T. Winch, an electrical contractor on the new high school building, was approved. Letters were read from Senators Catron and Fall, stating that they would look after the bill regarding municipal coal lands in compliance with a resolution recently passed by the council.

A committee of bakers appeared before the council asking time to get the special bread wrappers required by the new health ordinance. The bakers said it would require some time to secure the wrappings as provided by the law. They were assured that time would be granted but that the law must be complied with as quickly as possible.

The commissioners for the Barcelona acquia were present for a conference, but this was postponed until 10 o'clock this morning when the city engineer was instructed to confer with the commissioners with power to act, they protesting that the city had not kept the acquia open as agreed.

Ordinance No. 520, which would require bicycles to carry lamps, was laid on the table.

Ordinance No. 523, requiring grades of streets in new additions to conform with established city grades, was read the first time.

City Attorney Lewis advised the council to institute a friendly suit against the county in order to settle the long standing and vexed question of burial of the paper dead, in order to determine definitely and finally whose is the responsibility.

NERVOUS DYSPEPSIA, GAS OR INDIGESTION

Each "Pape's Digestin" Digests 3,000 Grains Food, Ending All Stomach Distress in Five Minutes.

Time it! Pape's Digestin will digest anything you eat and overcome a sour, gassy or out-of-order stomach surely within five minutes. If your meals don't sit comfortably, or what you eat lies like a lump of lead in your stomach, or if you have heartburn, that is a sign of indigestion.

Get from your pharmacist a fifty-cent case of Pape's Digestin and take a dose just as soon as you can. There will be no sour risings, no belching of undigested food mixed with acid, no stomach gas or heartburn, fullness or heavy feeling in the stomach, nausea, debilitating headaches, dizziness or intestinal griping. This will all go, and, besides, there will be no sour food left over in the stomach to poison your breath with noxious odors.

Pape's Digestin is a certain cure for out-of-order stomachs, because it takes hold of your food and digests it just the same as if your stomach wasn't there.

Relief in five minutes from all stomach misery is waiting for you at any drug store.

These large fifty-cent cases contain enough "Pape's Digestin" to keep the entire family free from stomach disorders and indigestion for many months. It belongs in your home.

How Good That MUSTEROLE Feels!

A-a-h! That's delicious relief for those sore muscles, those stiff joints, that lame back. MUSTEROLE is a clean, white ointment, made with the oil of mustard and other home simples.

It does the work of the old-fashioned mustard plaster, minus the plaster and the blister!

You simply rub MUSTEROLE on the spot where the pain is—rub it on briskly—and the pain is gone.

No more, no bother, just comforting, soothing relief—fast a gentle glow, then a delightful sense of coolness. And best of all, no blisters like the old-fashioned mustard plaster used to make.

There is nothing like MUSTEROLE for Sore Throat, Bronchitis, Tan-sitis, Croup, Stiff Neck, Asthma, Neuralgia, Headache, Congestion, Pleurisy, Rheumatism, Lumbago, Pains and Aches of the Back or Joints, Sprains, Sore Muscles, Bruises, Chills, Prosted Feet and Colds of the Chest (it prevents Pneumonia). Doctors and nursing friends recommend MUSTEROLE. It is used in large hospitals.

At your drugstore, in 25c and 50c jars, and a special large hospital size for \$2.50. Accept no substitutes. If your drugstore cannot supply you, send 25c or 50c to the MUSTEROLE Company, Cleveland, Ohio, and we will send you a jar, postage prepaid.

Charles H. Kelly, Philadelphia, Pa., says: "I have great faith in Musteroles. Indeed, I have prescribed it for several of my patients this week; it is a very valuable remedy."

IMPORTANT WORK AT COMMERCIAL CLUB TONIGHT

Every Business Man in Albuquerque Urged to Attend Meeting This Evening. Climate Campaign Proposed.

Every business man in Albuquerque is urged to attend the meeting of the Commercial Club tonight. The meeting is the first general meeting of the club for 1914. It is proposed at this session to take up a number of matters of vital importance to Albuquerque and in which every one interested in the city should take part. The club directory are planning a campaign of active work for the city during the spring and summer and the meeting tonight will be devoted to large measure to the details of that campaign.

The question of a national campaign for the advertising of Albuquerque's climate will probably be brought up and with a number of strong advocates behind it. It is being pointed out that during the past few years the number of health seekers coming here has materially decreased, and this is believed to be due to the fact that other southwestern cities are drawing these people through their advertising campaigns.

Another matter which may be proposed tonight is the merging of the Retail Merchants' association with the Commercial Club. This has been proposed by several members of both associations and may come up for discussion.

There are other matters of even greater importance which are to be

CADELARIA BUYS ON SOUTH SECOND STREET

John Candelaria, brother of Ambrosio Candelaria of Albuquerque and a prominent sheep owner of Arizona has purchased a frontage of eighty-five feet on South Second street from the Bank of Commerce and others, and which he expects to improve in the near future. The transaction was made by the El Sitio Real Estate company. Mr. Candelaria and his brother already are holders of extensive real estate interests in Albuquerque and are showing their faith in the city by steadily increasing their holdings.

Open night and day, Trimble's livery, Red Barn, 211 W. Copper.

Found Sale.

On Friday, the 23rd day of January, 1914, at 10 o'clock a. m. in front of the City Jail, on North Second street, I will sell one bay horse, about 12 years old, will weigh about 800 lbs., branded on left shoulder, mane ratched and tail cut. Also one bay colt, about one and half years old, will weigh about 300 lbs., left front foot and both hind feet white.

THOMAS MC MILLIN, City Marshal.

SELLS 2,000 ACRES OF THE COCHITI GRANT

Thomas K. D. Maddison and Harry P. Owen returned last night from Bernallillo where Mr. Maddison yesterday as special master in the case of the Bonanza Development company vs. B. S. Roddy, sold 2,000 acres of the Cochiti grant, the Bonanza company bidding in the land. The sale is the result of long standing litigation.

Antikamnia Tablets

Unexcelled in the treatment of headache, neuralgia, migraine, coryza, in grippe and its sequelae, the lightning pain of lumbago and all pain due to irregular menstruation. In neuritis, and in the various neuralgias, in the nervous system, in the muscular system, in the circulatory system, in the digestive system, in the excretory system, in the reproductive system, in
